## *Foreword*

It has always been the wish and keen desire of the University authorities to assist, support and facilitate our faculty members in their attempt to apply for and secure academic titles.

An academic title does not only signify one's position in a learned profession in the academia but it also adds lustre to the personality or charisma of a teacher with auras of profound knowledge and research experience.

In this manual, we provide general guidelines as well as requirements stipulated by the Ministry of University Affairs (MUA) regarding award of academic titles. We include brief explanations of academic work to be undertaken, its quality, length, as well as style. Application methods and procedures are also suggested to make the information complete and readily available.

We hope the faculty members will find the manual useful as well as stimulating during their academic career at the University. It will provide me much pleasure to hear from them in case they need either assistance or suggestions in their pursuit of the highly coveted academic titles.
